【已完结】3Dmigoto学习笔记(6) dump部分内容

老样子,继续使用kena Bridge of Spirits来进行笔记记录,其它dx11游戏也是同样的原理。。

在上一节中,我实现了全部dump,但是这样的dump会导致导出的内容过多,一不小心就是十几二十个G,所以这节的内容主要记录如何实现部分导出。

第一步:寻找hash地址

首先打开游戏,开启hunting,寻找武器对应的hash地址:

记住这个ib的hash地址: 7cd583cd

第二步:修改配置文件

首先把全局的analyse_option关闭:

```
464
      ; analyse options can also be specified in [ShaderOverride*] sections (or other
465
       ; command lists) to set up triggers to change the options mid-way through a
466
      ; frame analysis, either for a single draw call (default), or permanently (by
467
      ; adding the 'persist' keyword).
468
469
      ; Alternatively, "dump" can be specified in a [ShaderOverride*] section (or
470
       ; any other command list) to dump specific resources with per-resource options
471
       ; (e.g. "dump = dump_tex dds share_dupes mono ps-t0"), dump resources at a
      ; specific point in time (e.g. "pre dump = 00") or dump a custom resource that
472
473
      ; frame analysis cannot otherwise see (e.g. "dump = ResourceDepthBuffer"). Use
474
      ; additional "dump" commands to dump multiple resources.
475
476
      ;analyse_options =deferred_ctx_accurate dump_rt dump_tex dump_cb dump_vb dump_ib buf tx
477
478
479
480
481
       ; Chain load other wrapper DLLs instead of system DLLs.
482
      L:-----
483
     □[System]
484
       ;proxy_d3d9=d3d9_helix.dll
485
486
      ;proxy_d3d11=d3d11_helix.dll
487
488
       ; We force all LoadLibrary calls back to the game folder, because games
489
       ; and nvidia both break the loading chain by going directly to System32.
490
       ; load_library_redirect=0 for off, allowing all through unchanged.
然后跳转到文件末尾,追加如下代码:
 [CommandListDump]
 analyse_options =deferred_ctx_accurate dump_rt dump_tex dump_cb dump_vb dump_ib buf txt
 [TextureOverride_武器]
 hash = 7cd583cd
 run = CommandListDump
```

analyse options =deferred_ctx_accurate dump_rt dump_tex dump_cb dump_vb dump_ib buf txt

保存配置文件后,进入游戏按F10重新加载配置文件:

[CommandListDump]

□ [TextureOverride_武器]

| hash = 7cd583cd
| run = CommandListDump

第三步: 开启hunting, F8导出并查看文件

可以看到导出的文件只有274MB

大功告成

现在我已经学会了3dmigoto的基础使用,学习笔记到此完结。
